

Keppel AmFELS, LLC's affirmation to QHSE is reflected through the organization's Quality, Health, Safety and Environmental Policy.

Keppel AmFELS, LLC providing engineering, procurement, construction and aftermarket services of land, offshore and marine topsides and platforms, shipbuilding, module fabrication and steel structures for the oil, gas, renewable energy, transport and industrial sectors is committed to:

- Strive for excellence in Quality, Health, Safety and Environment (QHSE) at work, aiming to satisfy our stakeholders through our objectives and continuous improvement of our management system and processes;
- Supply products and services which meet the requirements specified by our clients and that are communicated and understood by all levels of the organization, enabling us to plan and execute our work right from the start;
- Develop a sustainable business, using preventive actions to reduce pollution and industrial waste, and minimizing negative environmental impacts through the management of environmental aspects;
- Maintain a healthy and safe work environment, by preventing injuries and illnesses at work, managing the risks and being prepared for emergency situations;
- Comply with the applicable legal requirements and other QHSE related requirements to which we subscribe.

Keppel Core Values

A critical success factor is aligning our global operations to produce the same high quality and standards of timely, within budget and incident-free deliveries, associated with the Keppel brand. To achieve consistent excellence, we are committed to communicate and motivate our people to embrace a common set of core to form the foundation on which we perform work and conduct ourselves.
